// TYPES

Types of clamp bodies

The clamp bodies are available in these materials ex store:

- Polypropylene (dark green colour)
- Polyamide 6 (black colour)
- TPE (black colour)
- Aluminium

Upper and lower clamp halves are identical.
The inside of the clamp is available with or without grooves.

Grooves on the inside of the clamps have a vibration and impact reducing effect and absorb force towards the direction of the tube axis.

A spacing between both halves produces the prestress of the tube.

For the support of hoses and cables, we recommend to use clamps with an even inside without prestress. The spacing measure s_1 is not required. Thus, the block height h_1 is reduced.

Types of metal parts

As a regular feature of series A and B clamps, screws, rail nuts and cover plates are chromium VI free zinc coated, welding plates phosphatized and mounting rails uncoated.

As a regular feature of series C clamps, all metal parts are uncoated and phosphatized.

All metal parts of the different construction series are available ex stock in stainless steel type W5 (AISI 316).

Other surface treatments are available upon request.
UNC-threads are available upon request.

Metric thread	corresponding UNC-thread
M 6	$\frac{1}{4}$ – 20 UNC

SHIPBUILDING AND OFFSHORE SOLUTIONS

CORROSION-INHIBITING AND SOUND-ABSORBING | IN ACCORDANCE WITH DIN 3015

THE SHIPBUILDING AND OFFSHORE SOLUTION

- Systematic vibration insulation and structure-borne sound insulation
- Certified corrosion inhibitor in line with DIN EN ISO 9227
- Longer service life
- Increased maintenance intervals
- Greater durability of tubes and hydraulic lines

STANDARDS COMPLIANCE APPROVALS

- DNV-GL
- ABS (American Bureau of shipping)
- Bureau Veritas
- Lloyd's Register of Shipping

PRODUCTS

1. Tube clamps with noise protection insert
2. Tube clamps series 2+5
3. PP-CR® tube clamp
4. U-bolt

THE CORROSION INHIBITOR TUBE CLAMPS MADE FROM PP-CR®

STAINLESS STEEL TUBE (1.4571) AFTER 4,500 HOURS SALT SPRAY TEST

Result with
standard polypropylene

Result with PP -CR®

SAFETY WITH SYSTEM!

FLAME PROTECTED TUBE TUBE CLAMPS

OR IMPROVED RAILWAY VEHICLE SAFETY | IN ACCORDANCE WITH DIN 3015

THE ADVANTAGES

- Improved railway vehicle safety
- Flame protected in accordance with EN 45545-2, UL 94
- 2+5 system. Only 2 sizes for tube diameters 6 – 42 mm
- Plates and rails in steel and stainless steel

STANDARDS COMPLIANCE

FLAME PROTECTED TUBE CLAMPS ACC. TO
DIN 3015 CERTIFICATION IN LINE WITH

- EN 45545-2
- UL 94

SYSTEMATIC FOR IMPROVED SAFETY!

The well-known tube clamp range from RSB® has just got bigger. Now available as a flame protected version, it is the ideal solution for the transport and railway market. This means improved safety and efficiency for rail vehicles.

PRODUCTS

1. Multiclamp series A
2. Tube clamp series A
3. Visitec

SAFETY WITH SYSTEM!

// ASSEMBLY INSTRUCTION

Assembly on metal welding plates

Place welding plates on a base appropriate for the load. Make sure that the clamps are properly aligned. Clamp lower clamp half onto welding plate, insert tube, place upper clamp half onto lower half and fasten with the screws. Attention must be paid to the prestress (after completed assembly, clamp halves must not be in contact)! Do not weld with fitted plastic clamp! Extended welding plates may be screwfastened to the base.

Stacking assembly

RSB-Clamps allow the assembly of multiple clamps of the same construction size and of different tube diameters one above the other. The construction assembly is carried out with special fixing screws that are secured against twisting by applying a locking plate. Clamp lower clamp half on welding plate or mounting rail respectively, insert tube, place upper clamp half on lower half and fasten with fixing screws. The fixing screw juts out from the upper clamp half. The application of a locking plate securely fastens the fixing screw and prevents twisting. Clamp on second clamp half on to the fixing screws etc.

Assembly on mounting rails

Mounting rails are available in four different heights and come in pieces of 1m or 2 m length, as required. Weld on mounting rail or screw-fasten with fastening angle bracket. Insert mounting rail nuts in rail and turn until stop. For heavy duty construction series, nuts are simply pushed in. Clamp lower clamp half on mounting rail nuts, insert tube, place upper clamp half onto lower half and fasten with the screws. Before fastening the screws, the clamp may still be positioned. Attention must be paid to the prestress (after completed assembly, the clamp halves must not be in contact)!

// SCREW TIGHTENING TORQUE AND AXIAL PIPE SHEARING FORCES

The indicated screw tightening torque and axial pipe shearing forces refer to the assembly with weld plates, cover plates and hexagon head bolts according to ISO 4014/4017 (DIN 931/933). The axial pipe shearing force (according to DIN 3015, part 10) is an average value, determined by three tests made with a steel pipe according to DIN 2448 of St 37, for which static friction is presupposed (temperature during tests: 23 °C / 73.4 °F). When loading the RSB clamp with the indicated test force (F) in axial pipe direction, the pipe does not slide in the clamp.

**THE SOLUTION
FOR SUSCEPTIBLE TO CORROSION
APPLICATIONS**

PP-CR®

PP-CR has been developed based on our approved Polypropylene.

Crevice corrosion between the clamphalves and the tube is effectively retarded by a special corrosion inhibitor.

These properties have been tested and successfully approved in a salt spray test according to DIN EN ISO 9227.

Tube Clamps made of PP-CR are available in all standard dimensions of our approved RSB-TUBE CLAMP range.

Tube Clamps made of PP-CR are available in slate gray colour.

dimensions $\frac{\text{mm}}{\text{Inch}}$

All metal parts available in stainless steel.

¹⁾The usage of stacking bolts necessitates the use of locking plates during the construction assembly

²⁾When assembling solid rubber clamps, cover plates, hexagon screws and locking washers must be used

VISITEC

THE RAILNUT WITH LOSS PROTECTION

LIGHT SERIES

Order Code:

TM-A/B1 VISITEC 1.4571

TM-A/B1 VISITEC ZN

Available in zinc plated version and in stainless steel 1.4571

ADVANTAGES

- 40 % time savings during installation
- Fast and easy to install
- Vibration and sound insulating function
- Especially for vertical installations

The big flange prevents that the railnut falls into the rail during installation and has a vibration and sound insulating function.

The rubbercap has an integrated screw locking device. Fast and easy to install, easy to adjust, especially for vertical installations.

Order codes

for clamp-halves:

Polypropylene	RAPS-540
Polyamide 6	RANS-540
Rubber	RAVS-540

1 piece = 2 clamp halves

Fixing clamp for proximity switch built to EN 50 025 and 50 037 with square casing 40 x 40 mm (1.57 x 1.57 in). The sensors can be adjusted axially and laterally when mounted on mounting rails. Accessory materials same as in Series A, size 5.

Series A tube clamps of suitable diameter can be used for fixing proximity switches with a cylindrical casing built according to EN 50 008, 50 036 and 50 040 or similar.

2+5 ... THE SYSTEM!

ONLY 2 TUBE CLAMP SIZES

With our 2+5 RSB-Tube clamps system you can fix all tube diameters between 6 and 42 mm with only 2 tube clamp sizes.

- easy assembly, can be combined with all versions
- all metal parts of our standard program according to DIN 3015 can be used

Only one multiple weldplate with similar weldnut distances suits all tube clamps of size 2+5

INNOVATIVE DESIGN

– INSPIRED BY NATURE – HONEYCOMB-STRUCTURE

ADVANTAGES

- Optimized product-geometry
- Best possible distribution of pressure
- Highest possible tube holding force

All standard materials available.

Also suitable for twin clamp heavy series:

- Hexagon socket head screw IS-C (heavy series, size 2 and 3)
- Fixed adaptor BA (heavy series, size 2 and 3)

- Rail nut TM-C (heavy series, size 2 and 3)

- Mounting rail TS-C (heavy series)

- Stacking bolt AS-C (heavy series, size 2 and 3)

- Locking plate SPD-C (heavy series, twin version)

All metal parts available in stainless steel.

UNLIMITED POSSIBILITIES:

ONE MOUNTING RAIL FOR ALL

**ASSEMBLY OF SERIES A, B AND C COMPONENTS
ON TS-C MOUNTING RAIL**

Design

New mounting rail-nuts make it possible to mount standard tube clamps of our series A, B and C, on the heavy duty mounting rail, series C.

YOUR ADVANTAGE

Combine reliable and field-tested components of our various series for a multitude of new applicability:

ONE MOUNTING RAIL – MORE FUNCTIONS!

Also available in stainless steel.

**SERIES A
TM-A/C**

**SERIES B
TM-B2/C**

**SERIES C
TM-C1(4)**

// RAIL NUTS

The easiest way to mount DIN 3015 tube clamps on a rail of our heavy duty series.

Light construction – Series A
Twin-tube clamps – Series B
Heavy duty construction – Series C

TUBE CLAMPS WITH NOISE PROTECTION INSERT

Comparison of the noise insulation properties of different tube clamps (schematic)

Comparison of the pipe shearing force of different tube clamps

THE SYSTEM FOR VIBRATION INSULATION AND STRUCTURE-BORNE NOISE INSULATION
THE SUITABLE SOLUTION FOR EACH APPLICATION!

The production of quiet machines, devices and equipment becomes more and more important due to the growing environmental awareness.

With our noise protection system

- Fully flexible tube clamps TPE
- Tube clamps with noise protection insert EE/TPE
- Tube clamps with noise protection insert EFA/TPE

you cover all fields of applications.

THE FULLY FLEXIBLE TUBE CLAMP

OPTIMUM SOUND INSULATION AND VIBRATION DAMPENING

THE PRIMARY MATERIAL

The fully flexible tube clamps are made out of thermoplastic caoutchouc.

THE ADVANTAGES

Decisive improvements regarding noise insulation and vibration behaviour. Easy securing also of sensitive tube and pipe installations. The essential qualities of this material are appreciably higher than those of comparable vulcanized rubber products.

THE CONSTRUCTIONS DETAILS

The internal surface are smooth or grooved.
A useful screw safety-device guarantees perfect connections also for the solid rubber construction – therefore making a self – acting loosening impossible! The welding plates, covers and screws are also available in stainless steel.

**Please order available measurements
at the standard range DIN 3015.**

Low noise and
vibration level

Weather-proof and
brittle-resistant

Shape stability
with high elasticity

Resistant against
many chemicals

Wide temperature
deployment area

Tube clamp

// 06

TUBE CLAMPS SERIES O

- quick assembly
- space-saving
- Cover plate provides for stable fixing
- secure clamping of tubes due to pre-clamping
- different tube diameters combinable
- Fixing with screws
- particularly suitable for cables, hoses, gas and oil pipes, lubricating lines
- Metal parts also available in stainless steel

Tube clamp series O
space-saving and flexible
from Ø 6 mm to 22 mm

Double-tube clamp series O
with same diameters
from Ø 6 mm to 22 mm

Double-tube clamp series O
with different diameters from
Ø 6 mm to 22 mm

// TUBE CLAMP SERIES O

Order codes for clamp-halves:

Polypropylene **ROP-***
Polyamide **RON-***

* supplement with size and
tube Ø mm (e.g. ROP-106)

Packing standard:
100 pieces

NOISE PROTECTION INSERT

Areas of application:

- Pneumatics
- Automotive Technology
- Machine tool industry
- Lubrication
- Naval Technology
- suitable for cables and hoses

TUBE FASTENING ON A CYLINDER

Tube support – Adaptor – Clip – Worm thread clamps

ASSEMBLY:
THE “CLIP + READY”-SYSTEM!

THE COMPLETE SYSTEM CONSISTS
OF THE FOLLOWING INDIVIDUAL
COMPONENTS:

Tube support, adaptor, clip and worm thread clamps. Practical solutions for many different assembly situations can be found by either using an individual component or by combining all the components. For example:

- Assembly of tubes or hoses on hydraulic cylinder
- different tube or hose diameters
- different distances between tubes and cylinder
- the assembly of several tube supports for different tube diameters

	FIGURE 1.	FIGURE 2.	FIGURE 3.

HYDRAULIC STEEL CLAMP

*SPACE-SAVING SYSTEM
CAN BE WELDED AFTERWARDS
ALLOWS VIBRATION-FREE LAYING AND MOUNTING OF TUBES*

DESIGN

Top and bottom clamp halves are identical. The support-block is welded in upend or flat position.

FIELD OF APPLICATION

The clamp is used for the whole mobile hydraulic. The small dimension of the clamp allows hydraulic tubes and hoses to be mounted afterwards.

**DO UP YOUR CONSTRUCTION MACHINES WITH HSRS
HYDRAULIC STEEL CLAMP HSRS**

**WELD-ON POSSIBILITY LATER ON VIBRATION-FREE
INSTALLATION OF TUBES AND HOSES**

The robust construction of the clamp provides for impact and vibration reduction. The low height of this clamp type allows hydraulic lines to be installed at any time later on – e.g. for the installation of additional units on construction machines.

The noise protection inlay provides for an improved noise reduction and guarantees the safe fastening of sensitive tubes and host lines.

// HYDRAULIC STEEL CLAMP

Order codes:

W1: Steel zinc plated **HSRS-***

* please add. Ø d2

HSRS hydraulic steel clamps are mainly used in the field of construction machinery.

The support-block is welded to the machine body or another component either in upend or flat position. The tube-clamp is screwed on.

The robust construction of the clamp has an impact- and vibration-insulation effect. The small dimension/height of the clamp allows hydraulic cables to be fitted on later – e.g. for installing additional equipment to building machinery.

NOISE PROTECTION INSERT

Order codes: EE-*

* complete with nominal clamp size and outside tube diameter

Hydraulik steel clamp HSRS also available with noise protection insert.

The advantages:

- improved quality as regards noise and vibration reduction
- safe fastening method even for very sensitive tube and hose lines
- only one clamp for different tube diameters

Material:

TPE 64° Shore

- high oil and weathering resistance
- Temperature stability between -40°C and +120°C

U-BOLT WITH TUBE SADDLE

AREA OF APPLICATION

Especially suitable for securing tubes with heat expansion. The tubes can be braced firmly to the bow or, alternatively, slide along grooves.

CONSTRUCTION

U-bolts are available in two designs:

RUBD DIN 3570 with 2 nuts and **RUBL** U-bolts with 4 nuts to be used with tube saddle **KUPK** or **KUPL**. U-bolts are available for tube diameters from 17 to 762 mm.

The tube saddles are made of polypropylene and poly-amide and are produced in a short or long version.

U-bolt with
tube saddle long

U-bolt with
tube saddle short

**// WE OPERATE A MEDIUM-SIZED
BUSINESS IN THE FIELD
OF PRECISION ENGINEERING,
PLASTICS PROCESSING AND LIGHTING
ENGINEERING.**

// WE ABOUT US

We operate a medium-sized business in the field of precision engineering, plastics processing and lighting engineering.

We stamp, bend, weld on state-of-the-art-machines. Our know-how in the field of chipless production makes us an efficient manufacturer in sheet metal processing. Our cutting shaping equipment allows us to realise our customers' wishes without delay. Our plastics processing's strenght lies in its flexibility.

We combine two product ranges under one roof:

- **RSB** - Tube Clamps
- **TECHMALUX®** - Lighting Technology

// THAT'S HOW TO GET TO US

Oberndorf is situated in the Neckartal, a valley conveniently situated between the Black Forest and the Swabian mountains and has an own junction to the A 81, the federal motorway between Stuttgart and the Western part of the Lake Constance region. Oberndorf is situated between cities of Rottweil and Horb.

The railway system is connected to all major cities in the surrounding region well as to Switzerland and Italy.
